

# EXCITING JOB OPPORTUNITY

Drowzee AS is collaborating with the health care system to develop a scalable and drug-free personalized treatment for people with sleep deprivation. The goal is to provide a learning tool, using neurotechnology, that identifies and guides the user towards a mental state of drowsiness.

## Responsibilities

- Develop mobile application and a back-end system that; processes signals from a brain sensor and gives an audio feedback signal when the user is relaxing mentally (reaches known threshold value).
- Free to choose technology and tools (currently using React Native).
- Lead the technical development with assistance from two part-time developers and two technical mentors.

## Preferred qualifications

- Structured and delivers on your promises.
- Teamworker and able to lead others.
- Build solutions that work in practice.

## We provide

- Challenging and meaningful work
- Technical mentorship
- Equipment
- Offices
- Social events
- Fruit and coffee @ work

A dark grey rounded rectangle containing four white icons on the left and their corresponding job details on the right. The icons are: a document with a person (Software Developer), a shield with a checkmark (Full-time flexible), a location pin (Trondheim/Oslo), and a dollar sign (\$\$) (Salary and equity).

	<b>Software Developer</b>
	<b>Full-time flexible</b>
	<b>Trondheim/Oslo</b>
	<b>Salary and equity</b>
